## **DETAILED ACTION**

This Office Action is in response to Applicant's Election filed March 23, 2006. Group III has been elected consisting of claims 21-34 and 48. Claims 21-34 and 48 are presented for examination.

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 21-34, 48 are rejected under 35 U.S.C. 102(e) as being anticipated by Anuff et al. (hereinafter "Anuff", US Patent 6,327,628 B1).

As per claim 21, Anuff discloses a customizable application system comprising:

- An application execution system configured to support an internet application (column 2, lines 1-10, column 3, lines 5-20);
- A user interface generator operable to generate an application user interface
  including a user interface element, the application user interface being configured as
  an interface between the internet application and a client and being configured for
  delivery to the client over a computer network, the user interface element including a

Art Unit: 2157

find command user customizable with respect to a scope of data search (column 4, lines 16-30, column 6, lines 60-67);

- Metadata characterizing the find command (column 6, lines 35-47);
- A data repository including a data record further characterizing the find command, the data record being user modifiable in response to receiving input from a user defining a property for the user customizable find command and being accessible using the metadata, the property specifying the scope of the data to search (column 9, lines 30-35, column 11, lines 15-35).
- Wherein the application user interface is automatically generated and configured with the property for the find command (column 9, lines 56-61, column 14, lines 27-28).

As per claim 22, Anuff discloses the customizable application system of claim 21, wherein the data searched is a result of a query or is a result of a find command (column 11, lines 48-55).

As per claim 23, Anuff discloses the customizable application system of claim 21, wherein the find command is alternatively customizable to search data displayed in the application user interface or to search all rows associated with a result, a subset of all rows being displayed in the application user interface (column 8, lines 1-5).

Art Unit: 2157

As per claim 24, Anuff discloses the customizable application system of claim 21, wherein the application user interface is configured for display at the client using standard web browser protocols (column 13, lines 55-67).

As per claim 25, Anuff discloses the customizable application system of claim 21, further including a personalization system configured to modify the data record (column 4, lines 6-11).

As per claim 26, Anuff discloses the customizable application system of claim 21, wherein the application user interface is configured for display at the client using features of a web browser, the features not requiring a browser add-on, plug-in, or extension (column 2, lines 60-67).

As per claim 27, Anuff discloses the customizable application system of claim 21, wherein the find command is configurable according to an identity of the client or to an identity of a user. (column 8, lines 25-35)

As per claim 28, Anuff discloses the customizable application system of claim 21, further including means for generating the application user interface using the metadata (column 13, lines 40-60).

Application/Control Number: 10/040,396

Art Unit: 2157

As per claim 29, Anuff discloses the customizable application system of claim 21, further including an application server configured to support the internet application (column 14, lines 3-7).

As per claim 30, Anuff discloses the customizable application system of claim 21, further including an other application user interface having the find command, wherein the data record is configured to characterize the find command in both the application user interface and the other application user interface (column 14, lines 15-25).

As per claim 31, Anuff discloses the customizable application system of claim 21, wherein a customizable state of the find command persists from one use of the application user interface to another use of the application user interface (column 5, lines 34-47).

As per claim 32, Anuff discloses the customizable application system of claim 21, wherein the client is a wireless system (column 3, lines 1-25).

As per claim 33, Anuff discloses a computer readable medium including an internet application, the internet application comprising:

Metadata defining an application user interface, the application user interface
including a user interface element with a user customizable find command, the
application user interface configured for delivery to a client and configured to operate

Art Unit: 2157

as an interface between a user and the internet application, the user customizable find command being customizable with respect to a scope of a search (column 6, lines 35-47);

- A user interface generator configured to generate the application user interface
  using a user modifiable data record stored in a location physically remote from the
  client the user modifiable data record configurable to characterize the user
  customizable find command (column 4, lines 16-30, column 6, lines 60-67);
- A configuration system configured receive input from a user to modify the user
  modifiable data record with a property for the find command, the property specifying
  the scope of the search wherein the application user interface is automatically
  generated and configured with the property for the find command (column 9, lines
  56-61, column 14, lines 27-28).

As per claim 34, Anuff discloses a computer readable medium including an internet application, the internet application comprising:

• An application designer configured to develop an application user interface, the application user interface including a user interface element with a user customizable find command, the application user interface configured for delivery to a client and configured to operate as an interface between a user and the internet application, the user customizable find command being customizable with respect to a SCOPC Of a Search (column 4, lines 16-30, column 6, lines 60-67);

Application/Control Number: 10/040,396 Page 7

Art Unit: 2157

A user interface generator configured to generate the application user interface
using a user modifiable data record stored in a location physically remote from the
client, the user modifiable data record configurable to characterize the user
customizable find command (column 4, lines 16-30, column 6, lines 60-67);

 A configuration system configured for a user to modify the user modifiable data record (column 4, lines 16-30, column 6, lines 60-67).

As per claim 48, Anuff discloses an application execution system comprising:

- Means for supporting an internet application (column 2, lines 1-10, column 3, lines 5-20);
- Means for generating an application user interface using a user modifiable data
  record configured to store data characterizing a user customizable find command,
  the user customizable find command being customizable with respect to the scope
  of a search (column 4, lines 16-30, column 6, lines 60-67);
- Means for providing the application user interface to a user, the application user interface including a user interface element, the application user interface configured as an interface between the internet application and the user, the user interface element including the user customizable find command, the user interface element configured for delivery to a client over a computer network (column 9, lines 30-35, column 11, lines 15-35).

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Barbara N. Burgess whose telephone number is (571) 272-3996. The examiner can normally be reached on M-F (8:00am-4:00pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on (571) 272-4001. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
